

SpaFinity's Quality Pedicure Chairs.

High Quality Pedicure Chairs manufactured to fit your spa needs and décor. SpaFinity announces their brand of high-end, high-quality Pedicure Chairs and Accessories that feature luxurious fixtures, ultimate comfort and built with only the highest grade components. The company currently offers two different designs of Pedicure Chairs, the M800 and the M800 Organic which are designed to serve the Day Spas and Resorts.

SpaFinity is one of the few Pedicure Chair brands that are manufactured with customized color and style options. Both come standard with a "Stressless" ergonomic chair covered with real Ultraleather for durability and comfort for the client. Both chairs are equipped with the Pipeless, Seal-less Hydrotherapy System by SANIJET for ease of sanitation. This patented system provides a clean, quiet and safe pedicure environment for both the client and technician. Basin and Shroud acrylics on the units are made with 100% acrylic and backed with fiberglass for extra strength and durability. Galvanized steel frames support each structure that withstand humid conditions. Chromatherpy lights offer an extra added value for your clients experience.

The M800 Pedicure Spa is equipped with many extra features in the chair to ensure your clients pedicure experience. Six-way power seat and electronic foot-rest gives the client and technician the correct position for the pedicure. Heat and vibration massage in three key zones: shoulders, lumbar and hamstring areas.

The M800 Organic is a new look for Pedicure Chairs. The chair and basin sit in a wood surround that is manufactured with Beech wood, stained with a marine grade conversion stain that will maintain its beauty for a long time. The wood will give your décor an Organic look and feel. The chair moves on a manual glide system for swivel and distance to basin. Chair is designed with limited electronic options to reduce the amount of electricity used. The basin holds 4 ½ gallons of water which is lower compared to other units in the market and also environmentally friendly.

SpaFinity's mission is supplying products that are designed with purity, quality and ease of sanitation securing a peace of mind for the client, technician and spa-owner.
